

Alkaline Foam Cleaner

Degrasan® SR 180

Characteristics:

Degrasan SR 180 is an alkaline foam cleaner for the daily cleaning in slaughterhouses, meat-processing plants and butcher shops. The product is especially suitable for the cleaning of floors and machines. Due to its harmonizing active substance compounds, SR 180 removes efficiently fats, proteins, oil and other organic soiling. The application of SR 180 as a foam carpet fixes a sufficient amount of product on the surfaces to be cleaned and ensures the necessary absorption time.

- very good removal of fatty production residues
- foaming process without addition of a foam-booster

Technical Specifications

Color:	pale, yellow to brown
Consistency:	liquid
pH-value (1%):	12.5
Density:	1.12 g / cm ³

Material Compatibility

Metal:	The ready-to-use solution is suitable for stainless steel and not harmful to copper and brass. Not suitable for aluminum.
Plastics:	The ready-to-use solution is suitable for PVC (Poly Vinyl Chloride), EDPM (Ethylene-Propylene-Caoutchouc), FPM (Fluorine-Caoutchouc, Viton), CSM (Chlorine Sulfonyl Polyethylene), PE (Polyethylene).

With all other materials proper pilot tests should be conducted in suitable areas.

Declaration of Ingredients

Sodium hydroxide, potassium hydroxide, tensides, complexing agents

Product Code: SR180-0011
Description: 11 kg Can

Product code: SR180-0024
Description: 24 kg Can

Application / Dosage:

concentration: 2% - 5%
Temperature: 20°C to 50°C
Time: 5 – 20 minutes

As a rule, the application conditions depend on the type and level of soiling as well as the factors concerning the installation. An individual, operational application recommendation should be established in a pilot test.

Hazard statements / Safety Instructions

See Material Safety Data Sheet (MSDS) and product label for detailed handling, precautionary, and first aid information.

Waste water management

For the intended application and in compliance with possible local regulations, there are no known negative environmental effects.

Monitoring

By titration or conductivity.

Storage Information

Store in well sealed containers in a dry and cool area. Avoid exposure to frost and heat. Protect from direct sunlight.

Ecology

Refer to material safety data sheet (MSDS)
